### **DETAILED ACTION**

Applicant's amendment received on 2/17/06 is acknowledged.

#### ***Specification***

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Wavelength conversion laser apparatus with tunable fiber Bragg grating.

#### ***Claim Objections***

Claim 9 is objected to because of the following informalities: Claim 9 recites the limitation "grating expanding means" in lines 2-3. There is insufficient antecedent basis for this limitation in the claim since claim 9 depends on claim 7. Claim 9 should be dependent on claim 8. Appropriate correction is required.

#### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species:

1. Fig 1 claims 1, 2
2. Fig 2 claims 1, 3
3. Fig 3 claims 1, 3, 4
4. Fig 4 claims 1, 5
5. Fig 5 claims 1, 6
6. Fig 6 claims 1, 6
7. Fig 7 claims 7, 8, 9, 11, 12

8. Fig 8 claims 7, 8, 9, 13

9. Fig 9 claims 7, 8, 10, 11, 12

10. Fig 10 claims 14-20

The species are independent or distinct because they represent different embodiments of the present invention.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
